Resolution 4

U.N. Organ: General Assembly

U.N. Committee: General Assembly

Topic: Information and Communication Technology

Sponsor: Madagascar

The General Assembly,

Observing that internet connection in Madagascar is only available in large cities and is very expensive is keeping the citizens of Madagascar from connecting to people and organizations in the rest of the world,

Taking into account that Madagascar has made tremendous progress in the fields of medicine and science in the last ten years,

Aware that the poor countries of the world are in dire need of technological equipment to strengthen a global infrastructure and become more efficient in medical, education, and industrial technology,

1. Calls upon the international community to increase internet coverage so all citizens of Madagascar can access it;
2. Further requests financial aid to continue to build more efficient hospitals to care for our country's sick;
3. Encourages leaders of advanced technological countries to donate money and computers to educate countries' workers on how to effectively use technology.
